

Sprint planning SW5

01 october, 13:00

1. Objectives

Discuss the application architecture. (package structure, class structure etc)
Update sprint/product backlog

2. Reports

Sprint backlog from previous sprint incomplete.

3. Discussion items

Architecture - how should packages be structured
Alarm structure

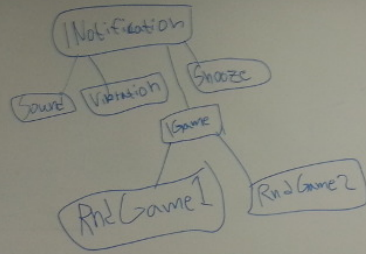

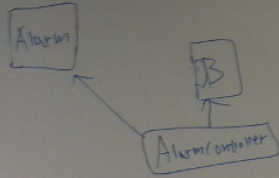

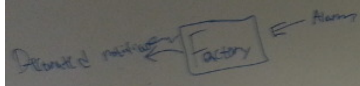

4. Outcomes and assignments

We have decided that we are going to use a decorator pattern for building unique alarms which gives us good customization and scale-ability.

After evaluation we have come to the conclusion that we need to restructure our current application. A preliminary new architecture can be seen below.

Product backlog now contains all user stories

New sprint backlog done with those items that weren't completed.

Activities
Utilities
Games
