	Sprint 0. [1]																			
Goal:	Get basic functionallity working																			
Agenda:																				
Time Period:	1 week																			
									day											
Story ID	**Story/task**	0	1	2	3	4	5	6	7	8	9	10	11	12	13	**Task taker/Person**	**Comments**		
		0	0[2]	0	0	0	0	0	0	0	0[3]	0	0	0	0				
1[4]	Setting the alarm																		
2	Alarm modification																		

[5]

1. sprint goal
2. The formulae sums hundreds of cells. Just not to have to update the formulae when number of tasks changes significantly
3. Effort left went up after some new work has been discovered
4. Id of the story. To simplify linking to the product backlog
5. See for reference and comments. Feel free to remove the link, though it would be very kind of you to leave it somewhere on the sheet
