Vibration requirement

ID	004
Use case / scenario:	Vibration
Trigger	Alarm goes off with vibration setting is on.
Precondition:	Alarm is set and the specific time is reached.

Basic path
User activates the vibration function and sets an alarm. When the alarm goes off the phone vibrates

Exception path
1. Phone does not support vibration
Force close!

Post condition
If the alarm is dismissed/deactivated/snoozed the vibration should stop.
